Gary –

It was my understanding that we were going to base our volume estimates from the Contour Maps since we do not have extensive Extent of Contamination samples. You had mentioned that you were going to direct us as to which contaminants to run the Contour Maps. If we do not use the Contour Maps we would just be basing the volume estimate on the existing size of the pits and the corresponding action levels. We also need to know which screening level/action level to use in our volume estimate as well as any type of treatability study.

Jeff:

Do we have an volume estimate?

Also, the ERT Contact is Greg Powell 513.5697533. He indicated that you want to use an independent lab rather than a vendor to do a treatability study.

Thanks
